The sessions will be held in Okinawa, Japan and will include study tour inside and outside of Okinawa.

The period of the program is from August 20 to December 20, 2025.

Course Capacity: 8 participants

JICA Knowledge Co-Creation Program (KCCP)

The Japanese Cabinet released the Development Cooperation Charter in February 2015, stated that "In its development cooperation, Japan has maintained the spirit of jointly creating things that suit partner countries while respecting ownership, intentions and intrinsic characteristics of the country concerned based on a field oriented approach through dialogue and collaboration. It has also maintained the approach of building reciprocal relationships with developing countries in which both sides learn from each other and grow and develop together." We believe that this 'Knowledge Co-Creation Program' will serve as a foundation of mutual learning process.

b

For What?

Background

Today, Information and Communications Technology (ICT) is recognized as a key enabler for realizing sustainable development by offering tremendous opportunities for developing countries to take full advantage of the benefits of globalization. The ICT, in fact, enables all citizens to access basic services, such as education, health care, agroservices or financial services. Nevertheless, digitalization of government services often remains a challenge in developing countries, because of lack of not only adequate infrastructure but also highly skilled ICT personnel.

Objectives

This course aims for participant to become capable of analyzing business problems from the viewpoint of ICT and constructing ICT solution by defining the structure of ICT systems.

To Whom?

Job Areas and Organizations

This program is designed for IT architect in central government and/or other governmental organizations enhancing the ICT use in the work and service delivery.

The applying organization with the best intention to utilize the opportunity of this program will be highly valued in the selection.

Targeted Countries

Pakistan, Sri Lanka, Cook Islands, Palau, Algeria, Tanzania, Cabo Verde, Cote d'Ivoire

Participants who have successfully completed the program will be awarded a certificate by JICA.

Commitment to the SDGs

<Structure of the Program>

This course includes practical exercises, such as hands-on exercises for several subjects and sessions formulating an Action Plan, which is an ICT project to be developed by each participant, along with lectures, because JICA Okinawa believes that the acquired knowledge is solidified by repeatedly applying it in those practical exercises. This is especially true for technical training programs like this one.

The course also includes variety of activities, such as interactive lectures and observation tours to be conducted both in Okinawa and in mainland of Japan. Such a practice-oriented method enables each participant to be a truly skillful ICT staff member who can lead the implementation of e-Government initiatives.

JICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 2024115113001 Furthermore, as one of the major outcomes of this course, the abovementioned Action Plan will resolve business problems of the government of each participant. In order to assist each participant to implement his/her Action Plan, the training implementer will provide technical advice.

Expected Modules Output and Content:

<Overall Goal>

To be able to ensure reliability of the online service delivery and to improve efficiency of the work of the organization

<Course Objective>

To be able to analyze business/ICT problems, constructing ICT solution requirements, and defining the structure of ICT systems

<Module 4 Objective>

To strengthen comprehensive skills in analyzing and identifying the business problems, developing ICT solutions, and formulating an ICT solution proposal

<Module 3 Objective>

To gain skills of business requirement analysis, project management, and technical skills required for formulating an ICT solution proposal to address business problems

<Module 2 Objective>

To gain fundamental business skills required for playing a leading role in e-Government initiatives

<Module 1 Objective>

To understand a basic framework for e-Government promotion and for conducting analysis of the business planning and operation

JICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 2024115113001 In order to help each participant to acquire skills and knowledge, a participant is required to formulate an effective and feasible Action Plan. Please carefully read this section and ensure the preparation.

A. Preparatory Phase before the departure to Japan

Before start the program in Okinawa, each participant is requested to take following actions:

- 1) Read carefully the present document titled "General Information".
- 2) Identify key business challenges of his/her organization, which are relevant to this course concept, and discuss the theme of his/her Action Plan, with the supervisor.
- 3) Fill out the preliminary study sheet and other required forms, which will be provided by email from the training implementer after acceptance notification.

B. B. Core Phase in Japan (August 20 to December 20, 2025)

N.B. This plan is an interim version and the content and duration of each subject can be modified in due course.

11

, '

	Explain GIS outline.	Lecture and	2 days
1.	Explain GIS outline.		2 days
2.	Explain GIS outline for public services.	Exercise	
3.	Describe the information data structures, the file formats and the information collections which are used in GIS.		
4.	Explain the utilization examples of GIS for public services.		

<Module 2 Objective>

To gain fundamental business skills required for playing a leading role in e-Government initiatives

6	Logical Thinking		
	 Clearly grasp 'What to do' and 'How to do' to find problems and challenges and lead to the solution. Acquire logical thinking method which is required to project manager. 	Lecture and Exercise	2 days
7	Presentation skills		1
	 Explain factors of effective presentation. Plan effective actions to promote new technology and techniques. Explain concrete procedure and consideration points when planning outreach activities. Design effective contents for presentations. 	Lecture and Exercise	3 days
8	Problem-solving and Facilitation		
	 Master basic skill of problem solution and apply to a business. Build consensus among a project team and facilitate mutual understanding. Do effective negotiation and get smoother problem solving. 	Lecture and Exercise	3 days

JICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 202411511J001

9	Negotiation					
	1.	Negotiate calmly as a representative of ICT system planning, designing and development project.	Lecture and Exercise	2 days		
	2.	Get a consensus smoothly with stakeholders in project inside and outside.				

	red for formulating an ICT solution proposal to address busin	ess problems	
10	Business Requirement Interviewing		
	 Explain an importance of interviewing skill for requirement definition. Explain interviewing skill to extract requirement 	Lecture and Exercise	2 days
	 definition. Clarify customer's requirement definition and adjust them with customers. 		
11	Business Requirement Definition		
	 Apply requirement creation method. Apply business creation method. Apply business specification creation method. 	Lecture and Exercise	4 days
	 Apply requirement management. 		
12	Proposal Writing		
	 Explain planning and proposing method. Create a proposal. Evaluate a proposal and give necessary advices. 	Lecture and Exercise	3 days
13	Project Management		
	 Explain basic methodologies along with PMBOK guide which is a de facto standard of modern project management method. 	Lecture and Exercise	4 days
	2. Explain the outline of representative system development process model such as waterfall, incremental and prototyping models.		
	3. Explain what is scope and WBS.		
	4. Explain the schedule creation method for system development project.

JICA Knowledge Co-Creation Program (Group and Region Focus) JCT Care Personnal Development (A) IT Architect Course No. 2024115113001

Eligibility and Procedures

1. Expectations to the Applying Organizations

(1)This training course aims for an organization of a participant to become capable of strengthening the organization's ability to implement ICT strategies by utilizing knowledge and adopting skills which are obtained by a participant.

2. Nominee Qualifications

Applying organizations are expected to select nominees who meet the following qualifications.

(1) Essential Qualifications

- 1) Current Duties: As described in p. 2, Section I "For whom".
- Experience in the relevant field: Minimum of 2 years of experience or equivalent as an IT Architect, System Analyst, or Application Specialist. Experience of application system development would be desirable.
- 3) Educational Background: Undergraduate or post graduate degree.
- 4) Language: Excellent command of spoken and written English equivalent to TOEFL iBT 79 or higher (Note that all the participants will be required to make presentations and formulate his/her Action Plan in English. Please attach a photocopy of an official certificate for English ability such as TOEFL, TOEIC, IELTS etc., if available.).
- 5) Health: Must be in good health to participate in the program. To reduce the risk of worsening symptoms associated with respiratory tract infection, please be honest to declare in the Medical History (QUESTIONNAIRE ON MEDICAL STATUS RESTRICTION of the application form) if you have been a patient of following illnesses; Hypertension / Diabetes / Cardiovascular illness / Heart failure / Chronic respiratory illness.

JICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 2024115111001

(2) Recommended Qualifications

Expectations for the Participants

- Age: Between twenty-five (25) and for-ty (40) years old when the online program starts.
- 2) Job position: Officer level or higher
- 3) Gender Equality and Women's Empowerment : JICA seeks more female applicants due to the past records of fewer applications from women. JICA is committed to promoting gender equality and women's empowerment, and provides equal opportunities for all applicants regardless of their sexual orientation or gender identity.

3. Required Documents for Application

(1) Application Form:

The Application Form is available at the JICA overseas office (or the Embassy of Japan)

• If you have any difficulties/disabilities which require assistance, please specify necessary assistances in the QUESTIONNAIRE ON MEDICAL STATUS RESTRICTION (1-(c)) of the application form. Information will be reviewed and used for reasonable accommodation.

(2) Photocopy of Passport:

You should submit it with the application form if you possess your passport which you will carry when entering Japan for this program. If not, you are requested to submit its photocopy as soon as you obtain it.

*The following information should be included in the photocopy: Name, Date of Birth, Nationality, Sex, Passport Number and Expiry Date *It is recommended that your passport be valid for more than 6 months after the last day of the program.

(3) ANNEX 1 (APPLICANT'S PROFESSIONAL EXPERIENCE IN THE FIELD OF THE ICT):

Information collected from this form will be used to evaluate the eligibility of each candidate to the present course. It is therefore imperative to include the duly completed form in the application.

(4) ANNEX 2 (COUNTRY REPORT)

*<u>Remarks: The Application Form and ANNEX1.2 must be</u> computer-printed, NOT handwritten.

IICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 2024115113001

There are some cases which applicants are rejected since the application form is not readable.

4. Procedures for Application and Selection

(1) Submission of the Application Documents

Closing date for applications: Please confirm the local deadline with the JICA overseas office (or the Embassy of Japan). (All required material must arrive at JICA Center in Japan by July 7,

2025)

(2) Selection

Primary screening is conducted at the JICA overseas office (or the embassy of Japan) after receiving official documents from your government. JICA Center will consult with concerned organizations in Japan in the process of final selection. Applying organizations with the best intentions to utilize the opportunity will be highly valued.

The Government of Japan will examine applicants who belong to the military or other military-related organizations and/or who are enlisted in the military, taking into consideration of their duties, positions in the organization and other relevant information in a comprehensive manner to be consistent with the Development Cooperation Charter of Japan.

(3) Notice of Acceptance

The JICA overseas office (or the Embassy of Japan) will notify the results <u>not</u> later than July 22, 2025.

5. Additional Document(s) to Be Submitted by Accepted Candidates

Accepted participants will receive preliminary study sheet and other forms by the training implementer together with instructions by email after notice of acceptance. Then these documents have to be returned by the date designated in the email.

JICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 2024115113001

6. Conditions for Participation

The participants of KCCP are required

- (1) to strictly adhere the course schedule,
- (2) not to change the air ticket (and flight class and flight schedule arranged by JICA) and lodging by the participants themselves,
- (3) to understand that leaving Japan during the course period (to return to home country, etc.) is not allowed (except for programs longer than one year),
- (4) not to bring or invite any family members (except for programs longer than one year),
- (5) to carry out such instructions and abide by such conditions as may be stipulated by both the nominating Government and the Japanese Government in respect of the course,
- (6) to observe the rules and regulations of the program implementing partners to provide the program or establishments,
- (7) not to engage in political activities, or any form of employment for profit,
- (8) to discontinue the program, should the participants violate the Japanese laws or JICA's regulations, or the participants commit illegal or immoral conduct, or get critical illness or serious injury and be considered unable to continue the course. The participants shall be responsible for paying any cost for treatment of the said health conditions except for the medical care stipulated in (3) of "3.Expenses", "Administrative Arrangements",
- (9) to return the total amount or a part of the expenditure for the KCCP depending on the severity of such violation, should the participants violate the laws and ordinances,
- (10) not to drive a car or motorbike, regardless of an international driving license possessed,
- (11) to observe the rules and regulations at the place of the participants' accommodation, and
- (12) to refund allowances or other benefits paid by JICA in the case of a change in schedule.

JICA Knowledge Co-Creation Program (Group and Region Focus) ICT Core Personnel Development (A) IT Architect Course No. 2024115113001

Administrative Arrangements

1. Organizer (JICA Center in Japan)

- (1) Center: JICA Okinawa Center (JICA Okinawa)
- (2) Program Officer: Mr. Nishihara Kohel (olcttp@jica.go.jp)

2. Implementing Partner

Fujitsu Learning Media Limited

3. Travel to Japan

- Air Ticket: In principle, JICA will arrange an economy-class' round-trip ticket between an international airport designated by JICA and Japan.
- (2) Travel Insurance: Coverage is from time of arrival up to departure in Japan. Thus, traveling time outside Japan (include damaged baggage during the arrival flight to Japan) will not be covered

4. Accommodation in Japan

Basically, JICA will arrange the following accommodation(s) for the participants in Japan:

JICA Okinawa Center (JICA Okinawa)

Address: 1143-1 Aza-Maeda, Urasoe-Shi, Okinawa, 901-2552, Japan

TEL: +81-98-876-6000

("81" is the country code for Japan, and "78" is the local area code)

Please refer to facility guide of JICA Okinawa at its URL

https://www.jica.go.jp/english/domestic/okinawa/index.html

5. Expenses

The following expenses in Japan will be provided by JICA

- (1) Allowances for meals, living expenses, and stopover.
- (2) Expenses for study tours (basically in the form of bus/train/air tickets).
- (3) Medical care for participants who become ill after arriving in Japan (the costs related to

IICA Knowledge Co-Creation Program (Group and Region Focus) ICT Care Personnel Development (A) IT Architect Course No. 2024115113001

pre-existing Elness, pregnancy, or dental treatment are not included).

(4) Expenses for program implementation, including materials.

- (5) For more details, please see "III. ALLOWANCES" of the brochure for participants titled "KENGHU-IN GUIDE BOOK," which will be given before
- (6) departure for Japan.

"Link to JICA HP (English/French/Spanish/Russian):

https://www.lica.go.jp/english/our_work/types_of_assistance/tech/acceptance/training/ index.html

6. Pre-departure Orientation

A pre-departure orientation will be held at respective country's JICA office (or the Japanese Embassy), to provide Participants with details on travel to Japan, conditions of the course, and other matters.

7. Work assignment upon the completion of the training course

Upon the completion of the training course, is your current work assignment envisaged to be changed or modified?

D Ves DNo

If your answer is yes, please describe tasks that would be newly/supplementary added to your work assignment. In case you are supposed to be assigned to a completely different new position, please also indicate the name and major tasks.

lew tasks to be added in addition to your current work assignment	
lew job title (if it is applicable)	

8. Course subjects of your organization's interest

Referring to the training subjects described in Page 11-15, what would be the most important subject(s) in tackling the business issue(s) that faces your organization? By filling in the table below, you are also requested to specify the reason why that subject can resolve the issue.

Priority	Course subject	Motil of your choice (why this subject can contribute to resolve your organization's business issue?)
1st:		
2nd:		
3rd:		
4th:	and the second	

s. Action Plan

This training program fails into one of JICA's training categories "SOLUTION CREATION TRAINING". Such program aims to facilitate solving problems in organizations by enabling the participants to acquire necessary knowledge and skills, which can address innovative solutions.

.

The creation of Action Plan therefore constitutes a core of this training course especially because it defies the roadmap to solve organization's business issues.

In this context, please describe business problems that your organization is interested in addressing within the framework of this training course. Some of those can be the scope of your future Action Plan.

	Business problems that should be addressed	Reason why your organization is interested in solving the problem	Proposed solutions

ANNEX 2

COUNTRY REPORT

Please describe in detail as much as possible. This report aims to better understand the level of your country's and government's approach to ICT deployment including e-Government.

Course Name: ICT Core personnel development/ IT Architect (A) (202411511J001)

Surname

Given name

Applicant's Name:

1. National e-Government Policy

(For improving citizen service delivery or integrating ICT solutions in government work, etc.)

(1) Name of the policy

(2) Leading organization in the policy implementation within government ministries and institutions

(3) Background and the outline of the policy

(current status, current issues, solutions, scope, implementation plans and stakeholders, etc.)

3	

2. National ICT Policy/Vision

(universal access to ICT, private sector development, E-learning or E-agriculture, etc.)

(1) Name of ICT policy/vision

(2) Leading organization in promoting ICT policy/vision within government ministries and institutions

(3) Background

Overview of ICT usage in your country

Total yearly sales of ICT industry (USS): (including foreign companies)

Percentage of the domestic ICT industry's yearly sales (USS)

Benchmark data on ICT usage used for ICT policy/vision

(4) Outline of the policy

(overarching objectives, target; scope, stakeholders and implementation plans, etc.)

JICA and Capacity Development

Technical cooperation is people-to-people cooperation that supports partner countries in enhancing their comprehensive capacities to address development challenges by their own efforts. Instead of applying Japanese technology per se to partner countries, JICA's technical cooperation provides solutions that best fit their needs by working with people living there. In the process, consideration is given to factors such as their regional characteristics, historical background, and languages. JICA does not limit its technical cooperation to human resources development; it offers multi-tiered assistance that also involves organizational strengthening, policy formulation, and institution building.

Implementation methods of JICA's technical cooperation can be divided into two approaches. One is overseas cooperation by dispatching experts and volunteers in various development sectors to partner countries; the other is domestic cooperation by inviting participants from developing countries to Japan. The latter method is the Knowledge Co-Creation Program, formerly called Training Program, and it is one of the core programs carried out in Japan. By inviting officials from partner countries and with cooperation from domestic partners, the Knowledge Co-Creation Program provides technical knowledge and practical solutions for development issues in participating countries.

The Knowledge Co-Creation Program (Group & Region Focus) has long occupied an important place in JICA operations. About 400 pre-organized course cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs is being customized by the different target organizations to address the specific needs, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

Japanese Development Experience

N.

3.

Japan, as the first non-Western nation to become a developed country, built itself into a country that is free, peaceful, prosperous and democratic while preserving its tradition. Japan will serve as one of the best examples for our partner countries to follow in their own development.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from, of course, has been accompanied by countless failures and errors behind the success stories.

Through Japan's progressive adaptation and application of systems, methods and technologies from the West in a way that is suited to its own circumstances, Japan has developed a storehouse of knowledge not found elsewhere from unique systems of

UU

organization, administration and personnel management to such social systems as the livelihood improvement approach and governmental organization. It is not easy to apply such experiences to other countries where the circumstances differ, but the experiences can provide ideas and clues useful when devising measures to solve problems.

4

.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.
