15th December 2021

Preamble

The Doctoral Day is designed primarily for students who are currently enrolled in the early to mid-stages of doctoral studies. It is an annual event which aims to create a space for exchange and dialogue between doctoral students, scientists and researchers on the one hand, and professionals and actors from the socio-economic world on the other hand in order to unveil behaviors and qualities of research leaders and managers. This meeting includes typology of knowledge and skills requirements and summarizes the gaps in knowledge and skills for improving effective research and innovation. Students will be encouraged to submit posters for discussion and to present topics of their thesis to help them advance in their academic progress.

Proficiency of verbal communication is becoming more and more imperative for academic researchers. So this day is devoted to the PhD students to either present their own research to more experienced researchers. This is an opportunity to strengthen their dissemination skills, with more emphasis on the individual academics talents, through valuable experience in communicating their research.

Finally, this annual scientific gathering will contribute to increase visibility of the growing research environment of our Faculty of Nature and Life Sciences.

TOPICS:

1. Physiology and Environment
2. Toxicology and Risk Assessment
3. Medicinal Plants and Pest Control
4. Bioactive Molecules
5. Biochemistry and Microbiology

PhD poster

Attendees are invited to register and submit a PhD abstract as part of the Doctoral Day. The PhD Poster will be presented on an A3 sized document and should detail the aims and objectives of the study, the key literature, the methodology and the contribution to knowledge.
