This event is an International Conference on Modern Electrical Engineering and Technology (ICMEET) will be held for the first time from 18th to 19th February, 2022 online at the University of Souk-Ahras, Algeria with a collaboration of the different research centres.

The conference main theme highlights the modern electric power system and technologies, from computing and sustainable energy systems for promoting smart micro-grids and local energy community to support the renewable energy sources; and creates an environment where researchers and professionals can collaborate and exchange experience. **Topics** of interest include, but are not limited to:

1. Power Quality in Modern Power Systems
2. Modelling and simulation of Renewables Energy System
3. Control system
4. Digital Technologies in Power Systems and Smart Grid
5. Artificial Intelligence and its application

Submitted papers must be unpublished and not being currently under review for any other publication. All submissions paper will be checked through plagiarism detection software Turnitin.

PUBLICATION OF PROCEEDING

Accepted and presented papers will be submitted for inclusion into the university conferences section. A selected of high-quality presented papers will be published as a special issue in the indexed journal:

[Electrical Engineering & Electromechanics](#); Indexed in Web Of Science & Scopus
