Damage and Fracture Mechanics

Failure Analysis of Engineering Materials and Structures

Boukharouba, Taoufik; Elboudjaini, Mimoun; Pluvinage, Guy (Eds.) 2009

ISBN 978-90-481-2669-9

The proceedings of the AIQ-ICF conference is a collection of papers on recent advances in methods and approaches to Damage Control and Fracture Mechanics.

Written by leading international experts in the area, this book presents new ideas in the field at the highest level and will promote technology transfer and be a key reference for researchers in industry and academia. Subjects cover the broad field of materials properties and performance, including computational approaches to engineering and modelling, materials for energy applications, nanomaterials, biomaterials/biomechanics, pipeline materials, stress corrosion cracking and hydrogen embrittlement, design and construction in joining/welds, high strength steel (X100 and higher), fracture mechanics, structural reliability, failure analysis, fatigue, environmentally assisted cracking, fracture dynamics, polymers and composites, and reinforced concrete.

Content Level » Research

Keywords » European institute on fatigue and fracture - European society for integrity of structures - Fracture Mechanics - Société française de mécanique
